PROJECT

Sales Management System Website   01/04/2025 - 24/05/2025

Fullstack Web Developer | github.com/akhoa6204/HeThongBanHangDienTu
- Database: Designed database structure for the sales system using SQLite.
- Frontend: Built user interface with pure HTML, CSS, and JavaScript.
- Backend (Python & Django): Developed core features such as user authentication, shopping cart, and order processing.
- RESTful API: Created RESTful APIs using Django REST Framework to support frontend data interaction.

Note-Taking Application – Android App   01/02/2025 - 31/03/2025

Fullstack Mobile Developer | github.com/akhoa6204/NoteApp
- UI Design: Designed user interface using XML.
- App Logic (Java): Implemented core features including create, edit, delete, share, and store notes.
- Firebase: Integrated Firebase Authentication and Firebase Realtime Database.

EXPERIENCE

XinkGroup   5/2025 - 7/2025

Intern FrontEnd Developer
- Developed Hair Salon website interface using React.js and Redux.
- Communicated with APIs via Axios, handled data processing and integrated it into the user interface.
- Collaborated with backend developers and designers to implement features, ensuring stable performance and user-friendly experience.
